

8 Easy Steps To Configure Your Accurize Shooting System

Step 1: Download the Accurize App. (Tap on the dedicated image.)

Note: The app needs internet (wlan / mobile data) connection to work properly with the system.

Step 2:
Open the App

Accept the Terms and Conditions

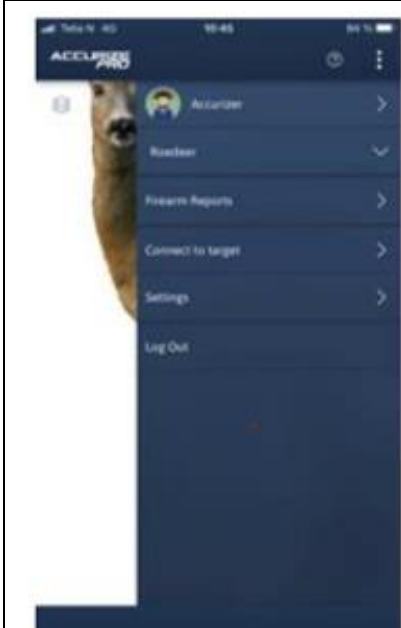

Step 3:
Register as a new user

Step 4:
Log in to the app

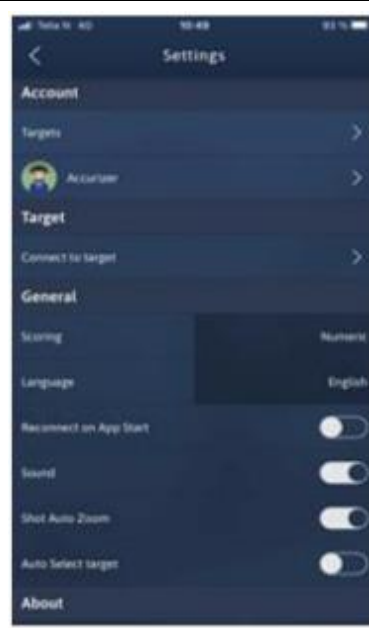

Step 5:
Press the button on the shooting system to switch it on (See image on the right)
Note: You need to keep it pushed until the red lamp lights up

Step 6: Add your target to the app, follow these manual steps.

Tap the dots up in right corner and select "**Settings**" to create a new target.

Tap "**Targets**"

Tap the "+" sign up in the right corner.

Step 6: Continue...

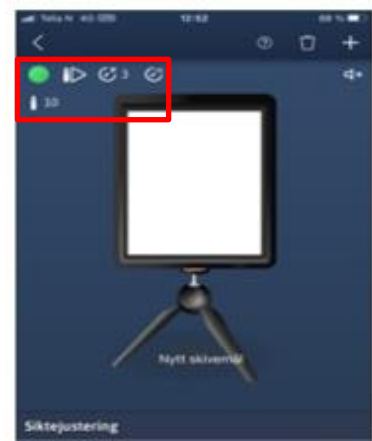

Tap the white screen

Tap the target you want to make

Note: Once a session has been recorded for a firearm, the target type, session length cannot be altered.

Choose session

- Length/time
- Shot sound
- Shot inhibit (block the target from receiving hit)
- Shot type (PRO app)
- Start sound for reaction display (PRO app)

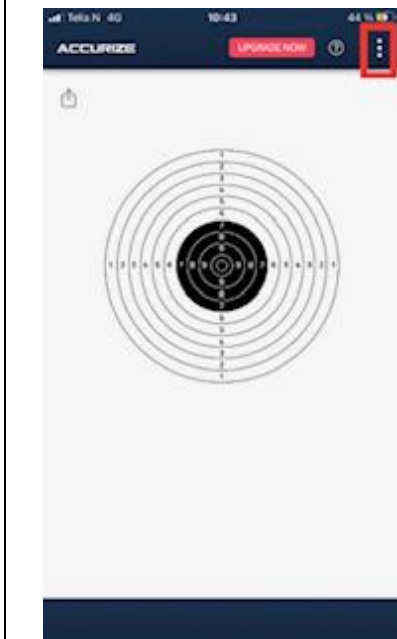

Scroll down on the page for manual sight adjustments. Tip mm or drag the cursor. Go back with the arrow up left corner to the home page.

Many of these functions are explained in video clips in the manual or on our YouTube channel <https://www.youtube.com/@accurize4797>.

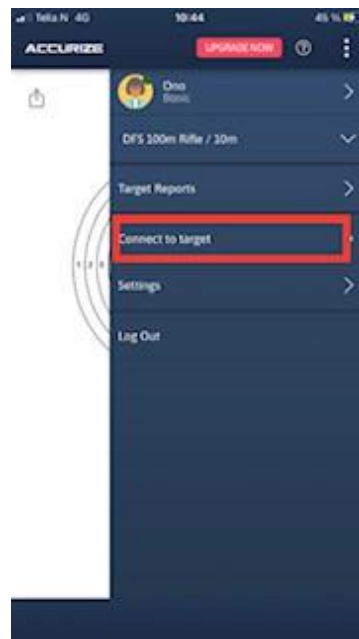

Go back to the start page by tapping the arrow in the upper left corner.

Step 7

When back on the start page
Click on the three dots on the
app upright.

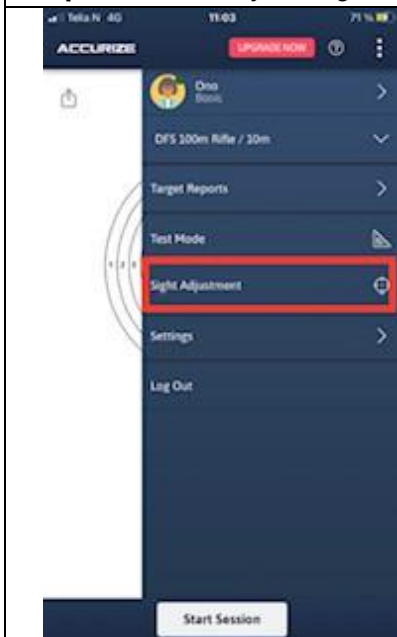

Click on button
"Connect to target"

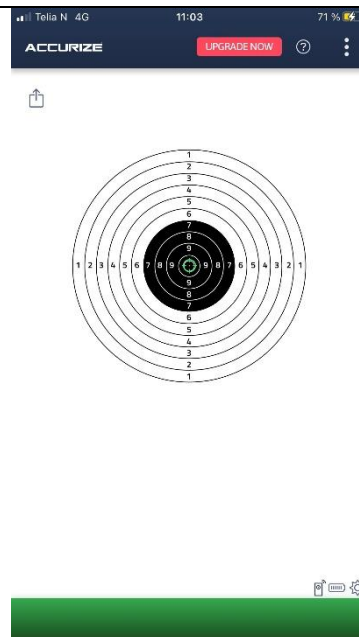

This will open the scanner and
it will search for your Accurize
Shooting System.

Your shooting system is connected to the app when **"Start Session"** appear.

Step 8: Calibrate your sight

Click on the three dots on the
app upright, then tap on **"Sight
Adjustment"**.

A green bar appears on the
bottom of the screen.

Shot one good shoot on
the target and it will
calibrate, the green line
will disappear, and the
"Start Session" will
appear on the bottom.

Tap session and you are
good to go!

Enjoy your first Training
session! 😊
